Email: info@vetfonds.lv
Test type: Complete
Date tested: 11/08/2021
Test number: 20212833
Customer number:

CCD's are negative

< 200
 Scores of less than 200 should be considered questionable and only be included if the allergens are found in the pet's environment and they relate to the clinical history.

200-250
 Scores in this range should be considered significant if the allergens are found in the pet's environment and they relate to the clinical history.

> 250
 Scores of 250 or above are unusually high. These allergens are significant especially if they are found in the pet's environment and relate to the clinical history.

* Elisa Absorbance Units. EA indicate the level of allergens specific IgE detected. The magnitude of the signal does not necessarily correlate with the severity of the disease but does reflect the pet's immune response to allergens.
